Asanti was built on the principle that technology, precision and intrepid design goes into every product we create. From our facility in Southern California we design, engineer and manufacture wheels with a passion to make them the ultimate compliment to your vehicle. Asanti wheels are recognized for diverse and detailed forging offerings, custom finishes and a handcrafted touch.

# DESIGN

Asanti design philosophy pulls inspiration from a variety of sources, that allows for fearless expression and pushing past the boundaries of what was previously thought capable in wheel manufacturing. All of our designs have had countless hours poured into them, to ensure they are the pinnacle in appearance, performance and quality for your vehicle. We aren't for everybody, and we like that.

# PROCESS

Each wheel manufactured in Asanti's state-of-the-art Southern California facility is made to be the perfect fit for your vehicle. A large variety of barrel, lip, forging and finish options allows us create wheels that will transform vehicle appearance and perform correctly on the most challenging fitments.
